Rosie goes to the doctor

When Rosie came to Patterson Health Center for her checkup, she wasn't sure where to go. But then she heard a cheerful voice say, "Hi there!"

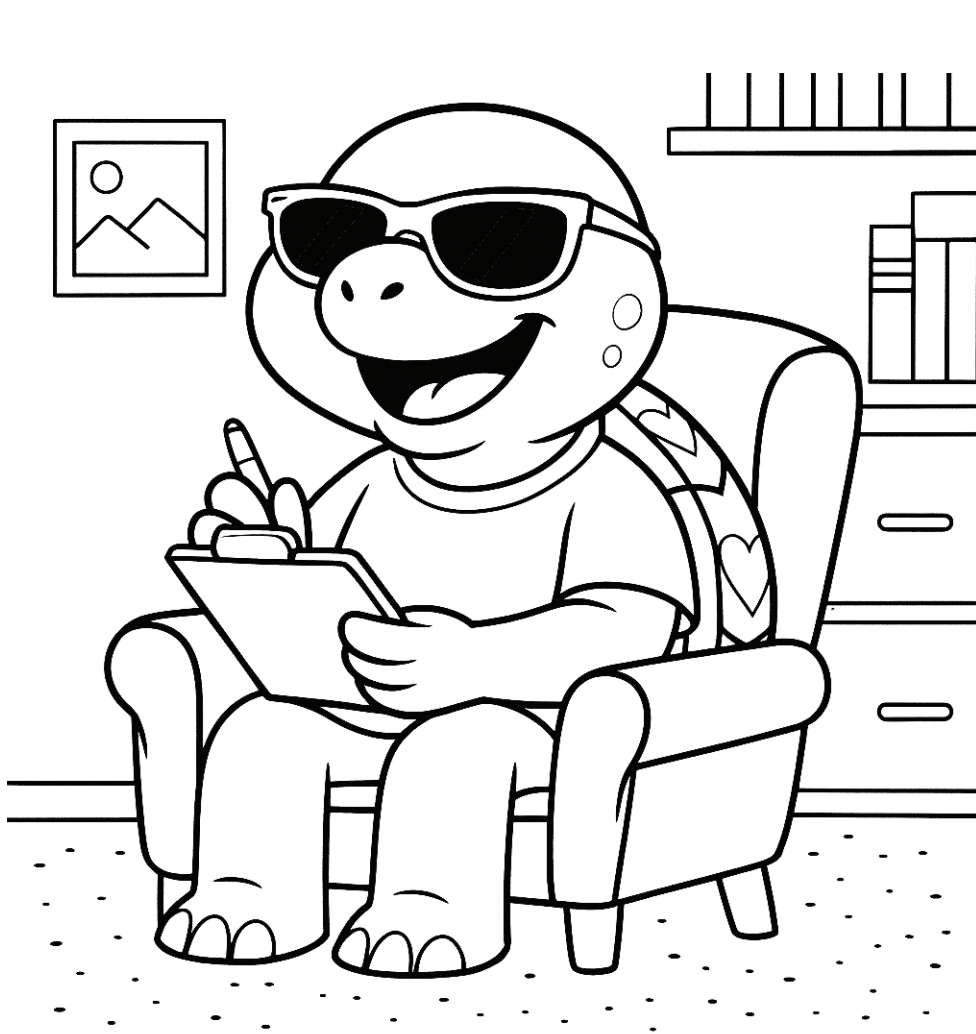

It was Fay! Fay is super friendly and helps people check in for their appointments. She's really good at remembering names, loves colorful sticky notes, and even has fun little plants on her desk. Fay always finds a way to make people smile!

At the end of her visit, Rosie felt happy and proud—she was healthy and ready to enjoy the rest of her day! She knows that going to the doctor is an important way to take care of her body and mind. Rosie is super thankful for all the friendly doctors, therapists, and helpers who make sure patients feel their best.

When was the last time you saw your doctor? Doc Sheldon and the whole turtle team can't wait to see you soon!

And don't forget - your turtle friends are ready for some color! Grab your crayons and bring them to life!

Rosie's last stop of the day was the mental health office. She wanted to check in and clear her mind before heading home. Rosie knows that taking care of your thoughts and feelings is just as important as taking care of your body—and she loves helping her friends understand that too. After talking with the therapist, she always feels calmer and more in tune with herself.

Meet Danny! Danny is kind, patient, and a really good listener. He helps people understand their feelings and reminds everyone that mental health is a big part of staying healthy. He enjoys writing in his journal, watching sunrises, and being a calm voice in a busy world.

Before her appointment, Fay told Rosie to stop by the lab to get some tests done. Rosie waited patiently until her name was called. Then she met someone who made everything feel easy and not so scary!

Meet Jamie! Jamie is super smart and loves looking for tiny clues that can only be found in the lab. She likes using microscopes, wearing fun gloves with cool patterns, and turning science questions like “What’s this?” into fun answers!

After the lab, Rosie walked over to the clinic waiting room. She watched the big TVs and looked around while she waited. Then she heard her name - called by a smiling nurse with a big, friendly grin!

Meet Nurse Nora! Nora is super kind and really good at her job. She checked Rosie's heart and temperature to make sure everything was A-OK. Nora can do lots of things at once, always pays attention to the little stuff, and loves wearing cozy socks, chewing peppermint gum, and making people feel better every day!

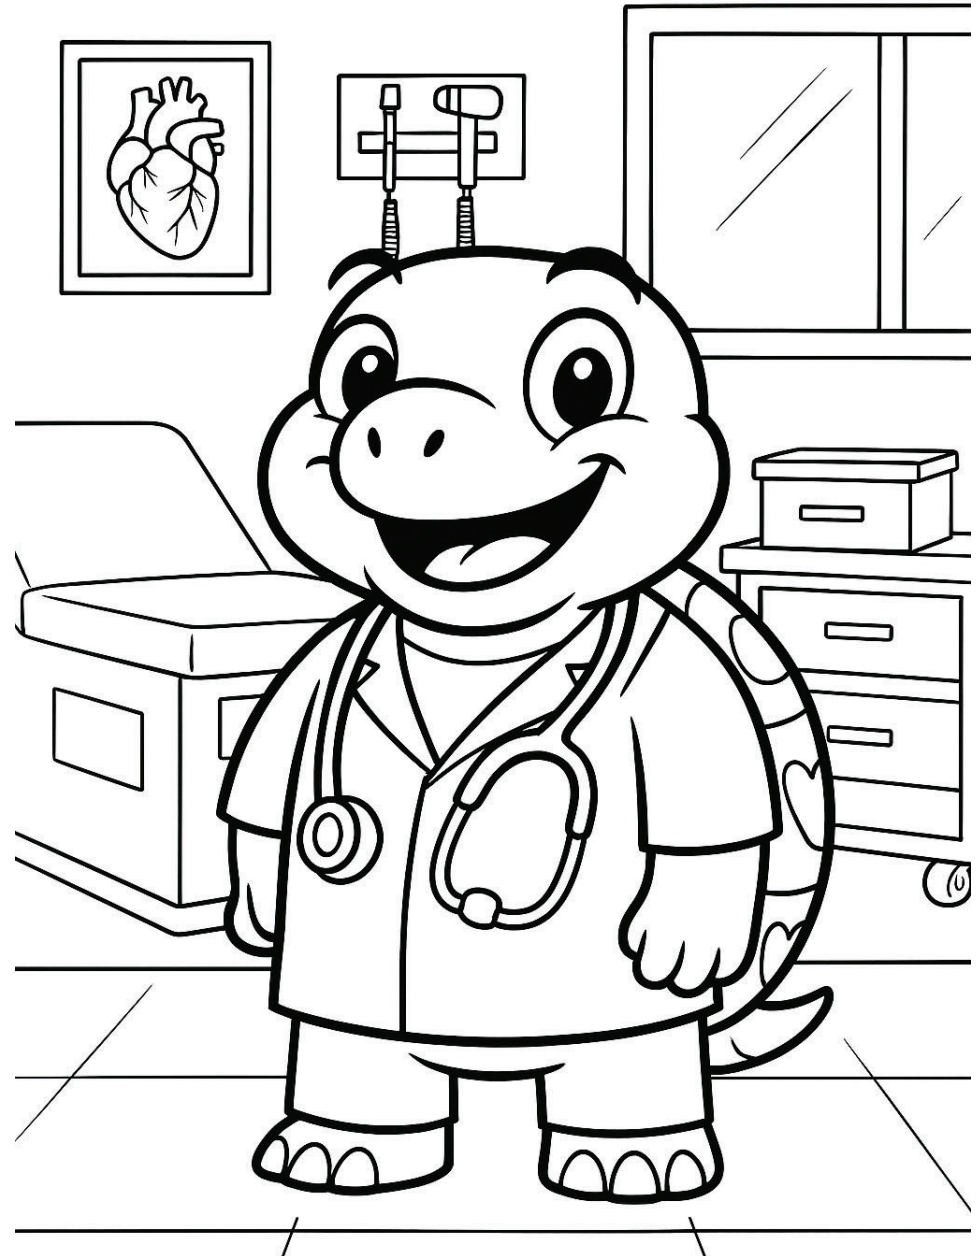

Rosie decided to make a whole day of it—and she even booked a visit to physical therapy! She liked that **Patterson Health Center** has everything she needs all in one place. Physical therapy can make her a little sore sometimes, but she knows it helps her get stronger and feel better.

Meet Penny! Penny is full of energy and always cheering people on. She celebrates every rep and every step her patients take! Penny loves using stretchy resistance bands, giving high fives, and keeping track of progress with her trusty clipboard.

After finishing her yummy meal, Rosie took a stroll and peeked down a hallway she hadn't been in before. One of the patient rooms had the door open, so she quietly looked inside. That's when she saw someone important helping make the room sparkle!

Meet Clarence! Clarence is a housekeeper who keeps hospital rooms clean and safe. He works hard to wipe away germs and make sure everything shines. He's tidy, thoughtful, and proud of every polished corner. You might even catch him sipping coffee early in the morning at the café!

It was finally time to see the doctor! Rosie felt good knowing her lab work and vitals were already done. That way, the doctor would have everything he needed to check on her health.

Meet Doc Sheldon, MD! He's a calm and caring doctor who listens closely and always wants to help. He's super smart and loves solving medical mysteries. He likes sipping black coffee, reading big books, and figuring out tricky problems - quietly, of course!

Doc Sheldon wanted to make sure Rosie was healthy both on the outside and the inside, so he asked her to get an X-ray. When she got to radiology, the team welcomed her with big smiles. She laid down on the scanner, and guess what? It wasn't scary at all!

Meet Randy! He's a radiology technologist who's super smart and a little bit silly. Randy can see what's going on inside your body using cool machines. He loves sci-fi movies, tricky jigsaw puzzles, and telling goofy dad jokes (even during X-rays)!

As Rosie walked past radiology, she smelled something yummy coming from the Patterson Café. Her tummy rumbled! She knew the café was famous for its tasty salad bar, made-to-order pizzas and sandwiches, and warm, delicious meals. When she saw turkey and veggies being served, she just had to grab a plate!

Meet Dottie! Dottie is the fun and friendly cook who makes sure everyone stays full and happy. She believes good food helps you feel your best! Dottie loves trying new recipes, making colorful meals - and sometimes she even hides veggies in the dessert. Shhh... don't tell!
